

Tinnitus

Technology products for
you and your loved ones

What you should know about tinnitus

Do you or someone you know suffer from constant “ringing in the ears”?

Maybe it’s not ringing exactly. Some people describe it as hissing, buzzing, whistling, roaring and even chirping. Whatever noise it is, the real issue is something called tinnitus.

Tinnitus (“TIN-a-tus” or “Tin-EYE-tus”) is the medical term for the sensation of hearing sound in your ears or head when no external sound is present.

The important thing to know is that tinnitus is not a condition or a disease. Instead, it’s a symptom — typically of something bigger, like an ear infection, high blood pressure or, most commonly, hearing loss.

| Quick Tinnitus Facts |

Tinnitus is the number one disability for military veterans¹

Tinnitus can occur at any age, and may begin suddenly or progress gradually¹

The most common causes of tinnitus are:²

- Noise exposure
(e.g., from shooting or machines at work)
- Aging
- Head injury
- Side effects from medication

It's also important to know that everyone's tinnitus is different, which is why finding relief has been so elusive — until now.

Starkey tinnitus technology products

Forever changing the way people deal with tinnitus

Starkey, a leader in hearing health technology, has engineered tinnitus technology products designed to forever change the way people deal with ringing in the ears.

These small, comfortable in-ear devices are designed to deliver all-day relief from tinnitus.

Starkey –
America's
premier
hearing
solution
provider

When it comes to comfortable, great sounding and personalised solutions for their hearing needs, people everywhere ask for Starkey — the only American-owned and -operated manufacturer of advanced hearing solutions. At Starkey, we believe to hear better is to live better.

How it works

Using Starkey's patent-pending Multiflex Tinnitus Technology, Starkey tinnitus products create a customisable and comforting sound stimulus that you and your hearing professional can fine-tune to soothe the unique, irritating sounds you hear and take your focus off of it.

Customisable to your unique tinnitus

Starkey tinnitus technology products deliver personalised relief for each individual.

Tinnitus affects every person differently. This includes how it sounds, how annoying it is or how debilitating it can be.

Starkey tinnitus products tackle the subjective nature of tinnitus head on. No other technology enables such unprecedented personalisation — to counterbalance your unique tinnitus.

Control is key

Starkey tinnitus technology products use the precise measurements from your audiogram to create a relief stimulus customised specifically to you. From there, you and your hearing professional can fine-tune relief in two unique but important ways:

1. Your hearing professional can adjust sound frequency and modulation to better match your unique tinnitus.
2. Starkey's proprietary SoundPoint tool lets you easily pinpoint your preferred sound settings, so your hearing professional can program them at the final fitting stage.

The result is
personalised
relief designed
just for you!

Find a tinnitus relief option tailored for you

Tinnitus can be different for everyone. That's why we offer a variety of customisable solutions.

Consult your hearing care professional to find the tinnitus relief option that's right for you.

fitting stage

Changing lives through the gift of hearing

**Our Founder and CEO,
Bill Austin, has always held
a strong belief that the gift of
better hearing results in a
fuller and richer life.**

We prove our dedication to this philosophy daily, through our support of Starkey Hearing Foundation.

The gift of hearing opens up new worlds of opportunity. It connects individuals to life and helps them realise they can accomplish more than they ever thought possible. Starkey Hearing Foundation uses hearing as a vehicle to change lives around the world.

Spreading hope from ear to ear

100+ countries

More than 1 million hearing
health care services provided to
people in need worldwide

Countless lives changed

What continuous innovation sounds like

We don't do technology for technology's sake. From the technicians in our labs to the scientists, audiological researchers and every employee at every level, we continually seek ways to better understand the science of hearing loss and its impact on people's lives — so we can continually develop better technologies to improve it.

Hear better. Live better.™
